Texture & Scratch-Resistant

A new textured design element with anti-scratch performance

Artistic Texture That Resists Scratches, Durable Metallic Aesthetic That Lasts

Scratch-Resistant (Electro-Hardened Coating) – Process Introduction

Specification Range:

Thickness: 0.5–10 mm

Max Width: 1530 mm

Max Length: 6000 mm

Process Flow:

Stainless Steel 2B → Mirror Finish → Texturing

→ Electro-Hardening (Scratch-Resistant) →

Titanium Coating → Imported Fingerprint-

Resistant Treatment

Functional Features:

Scratch-resistant, wear-resistant, high hardness, easy to clean, strong color adhesion, no edge cracking during bending

Vickers Hardness:

Micro Vickers Hardness:

200–900 HV

Coating Thickness:

Metallographic microscope measurement: 3–8 μm

Food Contact Material Testing:

Sensory test: compliant

Soaking test: compliant

Element migration: compliant

Usage & Maintenance Guidelines:

Use neutral cleaning agents for cleaning; avoid contact with acidic or alkaline substances
